1 Summary

Unemployment **fell** in most regions between 2022 and 2025. Jazan is the exception. This note shows the national trend (Figure 1) and the latest rates (Table 1).[1]

Rates are a share of the labour force, in %.

Unemployment in Riyadh fell between 2022 and 2025. In Riyadh the rate was 5.7% in 2025 Q4, against 7.9% in 2022 Q1: a change of −2.2 points.

The data cover:

- 13 regions and the Kingdom as a whole
- 16 quarters, from 2022 Q1 to 2025 Q4

Section 2 defines the rate.

Official figures are on the GASTAT website.

Printed 29 October 2026. The latest version is online.

[1] All figures in this note are synthetic, made for training.

2 Method

How the rate is defined

The unemployment rate is

$$u = \frac{U}{U + E} \times 100$$

where U is the number unemployed and E the number employed.
